

# K. VENKATA DHANUSH

## Python Developer | SQL Developer (Fresher)

Hyderabad, India | +91 9392856298 | [Kanasanidhanush7@gmail.com](mailto:Kanasanidhanush7@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

### PROFESSIONAL SUMMARY

Computer Science postgraduate with hands-on knowledge of Python, SQL, MySQL, Django, and Git/GitHub. Experienced in developing Python-based projects including an Expense Management System and an Online Fraud Payment Detection application. Familiar with basic machine learning concepts such as data preprocessing, classification, model training, prediction, and evaluation. Also have 1 year of professional experience as a Data Annotation Associate working with AI/ML datasets and performing quality checks.

### TECHNICAL SKILLS

**Python:** Core Python, OOP, Data Structures, Exception Handling, File Handling, Regular Expressions (re), argparse.

**Python SQL/ Databases:** MySQL — CRUD Operations, Joins, Aggregate Functions, Views, Database Design.

**Python & Database Development:** Input Handling, Data Validation, File Handling, SQLQueries, Database Integration.

**Machine Learning & Django:** MDjango, Basic Machine Learning, Data Preprocessing, Classification, Train-Test Split.

**Python Libraries:** os, sys, re, datetime, random

**Tools & Version Control:** Git, GitHub, Command Line

**Operating Systems:** Windows, Ubuntu

### WORK EXPERIENCE

#### Data Annotation Associate — Tao Digital Solutions

*September 2024 – September 2025*

- Performed image labeling, audio transcription, and video labeling to build high-quality datasets for AI/ML model training.
- Followed project-specific annotation guidelines and quality standards to ensure consistent, accurate data labeling
- Performed quality checks and validation on annotated data to maintain accuracy and consistency across datasets.
- Completed assigned annotation tasks within strict deadlines while maintaining high throughput and data quality.

### PROJECTS

#### Personal Expense Management — *Python, MYSQL, SQL*

[github.com/kanasanidhanush7-dev/Expense-Management-System](https://github.com/kanasanidhanush7-dev/Expense-Management-System)

- Built a Python-based expense management system to record, view, update, and manage personal income and expense data using MySQL.
- Designed and queried a MySQL database for transaction records, totals, category-based reports, and monthly financial information using SQL.
- Implemented CRUD operations, input handling, and data validation to manage transaction entries and maintain accurate records.
- Generated monthly reports and budget status showing total income, expenses, and remaining balance for easier expense tracking.

#### Online Fraud Payment Detection System — *Python, Django, Machine Learning*

[github.com/kanasanidhanush7-dev/online-fraud-payment-detection-using-ml-algorithms](https://github.com/kanasanidhanush7-dev/online-fraud-payment-detection-using-ml-algorithms)

- Developed a web-based fraud payment detection application using Python and Django.
- Worked with basic machine learning concepts including data preprocessing, train-test split, model training, classification, prediction, and model evaluation.
- Integrated the trained machine learning model with the Django application to predict whether a payment transaction is potentially fraudulent.
- Used Python for application logic and handled user input and prediction results through the web application.

### EDUCATION

**M.Sc. Computer Science** | 2026

Vikas PG College, Krishna University.

**B.Sc. Computer Science** | 2024

Vikas Degree college, Krishna University.
