

K. VENKATA DHANUSH

Python Developer | SQL Developer (Fresher)

Hyderabad, India | +91 9392856298 | Kanasanidhanush7@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Entry-level Python Developer with practical experience in Python, MySQL, and SQL, along with 1 year of experience in AI/ML data annotation. Skilled in Python programming, OOP, SQL queries, CRUD operations, joins, aggregate functions, and database management. Developed a Personal Expense Management system using Python and MySQL..

TECHNICAL SKILLS

Python: Core Python, OOP, Data Structures, Exception Handling, File Handling, Regular Expressions (re), argparse

Python SQL/ Databases: MySQL — CRUD Operations, Joins, Aggregate Functions, Views, Database Design

Python & Database Development: Input Handling, Data Validation, File Handling, SQL Queries, Database Integration

Machine Learning & Django: Machine Learning, Django, Predictive Analytics

Python Libraries: os, sys, re, datetime, random

Tools & Version Control: Git, GitHub, Command Line

Operating Systems: Windows, Ubuntu

WORK EXPERIENCE

Data Annotation Associate — Tao Digital Solutions

September 2024 – September 2025

- Performed image labeling, audio transcription, and video labeling to build high-quality datasets for AI/ML model training.
- Followed project-specific annotation guidelines and quality standards to ensure consistent, accurate data labeling
- Performed quality checks and validation on annotated data to maintain accuracy and consistency across datasets.
- Completed assigned annotation tasks within strict deadlines while maintaining high throughput and data quality.

PROJECTS

Personal Expense Management — Python, MySQL, SQL

github.com/kanasanidhanush7-dev/Expense-Management-System

- Built a Python-based expense management system to record, view, and manage personal income and expense data using MySQL
- Designed and queried a MySQL database for expense records, totals, and monthly financial information using SQL.
- Implemented input handling and validation to manage expense entries and display clear financial summaries.
- Generated monthly reports showing total income, expenses, and remaining balance for easier expense tracking.

Online Fraud Payment Detection System — Python, Django, Machine Learning

github.com/kanasanidhanush7-dev/online-fraud-payment-detection-using-ml-algorithms

- Developed a machine learning-based web application to detect fraudulent online payment transactions.
- Built the application using Python and Django with predictive analytics.
- Integrated machine learning models to analyze transaction data and identify potentially fraudulent payments.
- Designed a web-based interface for submitting transaction information and displaying prediction results.

EDUCATION

M.Sc. Computer Science 2026

Vikas PG College

B.Sc. Computer Science 2024

Vikas Degree College | CGPA: 7.0 / 10
